

STONHARD FLOOR SOLUTIONS

Regional Police Service Facility Ontario

AREA: LOBBY, HALLWAYS, CONCOURSES, KITCHEN
AND COMMON AREA

PRODUCTS USED:

- STONTEC ERF
- STONSEAL GS7 MATTE FINISH

THE CHALLENGE

A new regional police building was constructed to replace an older station, which was no longer functional for the growing community and police service. This new 47,000+ square foot building required a seamless flooring system that would offer easy cleanability, high performance qualities, and an attractive aesthetic. In addition to the main facility, an adjacent 26,000+ square foot forensics building also required a seamless flooring solution.

THE STONHARD SOLUTION

Stontec ERF, in a custom flake combination, was the ideal seamless flooring system for this unique project. This dense, stain resistant flake system comes in an

extensive range of finishes and colour options. Stontec floors minimize downtime for renovations, and save critical path time on new construction projects while offering exceptional design options.

Applications for Stontec floors vary from light manufacturing, to laboratories, lunchrooms, change rooms, hallways, offices and holding areas in healthcare, educational and correctional facilities. To learn more about Stontec floors, and Stonhard's full line of seamless, high performance flooring solutions, visit us at www.stonhard.ca
